Foreword

INTERNATIONAL EDUCATIONAL EXCHANGE has been the subject of two earlier bibliographies published by the U. S. Office of Education. Prepared originally under a title slightly different from the present one, the first compilation was made by Thomas E. Cotner and John W. Grissom in 1951. This was revised and updated by Frank A. Knapp, Jr., and published in 1954.

The current bibliography is greatly expanded and includes a new section on bibliographies in related fields, such as comparative education and English as a foreign or second language. Both of these fields concern to some extent American and foreign exchangees and problems of orientation, guidance, and counseling. For this reason it seemed desirable to have a new section on bibliographies in these fields, but not to duplicate their listings.

An effort has been made to limit the coverage in the remaining sections of this bibliography to the international exchange and training of students, teachers, professors, research scholars, leaders, and specialists, and to trainees in many fields from other countries and their American counterparts going abroad.

It is believed that the publication will be useful to Foreign Student Advisers, Fulbright Program Advisers, personnel of public and private agencies, and to foundations and other organizations participating in exchange programs (including hospitality centers and international relations discussion groups). Graduate students and others engaged in research on various aspects of exchange should also find the compilation useful.

Acknowledgment is gratefully made of the assistance given by the many individuals and organizations that furnished listings for the bibliography. Miss Kathleen Nelson and Miss Martha Page, staff assistants, Educational Exchange and Training Branch, assisted in its compilation.
